GTK OPEN CREATIVE COMMONS ATTRIBUTION 4.0 PRODUCT LICENCE

Open products of the Geological Survey of Finland (GTK) have been licensed with the [Creative Commons Attribution 4.0 International](#) licence.

The Creative Commons Attribution (CC BY) 4.0 licence requires that the source of data material is named as required by the licensor. GTK can always request attribution and copyright information to be removed, insofar as is possible.

- The copyright notice included in the material must be retained as indicated in the licence. The copyright notice may also include the material publication date and version number, the name of the publisher and other significant information considering the identification of data.
- Regular disclaimers included in the material must be retained as indicated in the licence. Sources must include a hyperlink to the website containing the original material, if technically possible.
- If the material has been edited, this must be indicated, and a hyperlink to the original unedited material must be added to the edited material.
- A marking of the CC BY 4.0 licence and a hyperlink to the licence must be added to the material.

Example of a recommended copyright notice: Name of licensor, name of material and the date on which GTK transferred the material (e.g. GTK open licence CC BY 4.0, including GTK's Superficial deposits 1:20 000 / 1:50 000 data, imported from Hakku service on 1 June 2018).

Licence URL: <http://creativecommons.org/licenses/by/4.0/deed.fi>

More information about the licence: Creative Commons Attribution 4.0 is a licence in accordance with the JHS 189 recommendation for open data material of public organisations.

GTK's previous open licence applies to open material deployed and productised between 21 November 2012 and 21 May 2018.
